

Malte Budig

Mobile-focused engineer shipping cross-platform product features that hold up in daily use

 Stuttgart / Remote / Japan-friendly collaboration

Open to frontend, fullstack, and mobile product roles

Profile

I care about how software feels when it is actually used in the field, not just how it looks in a demo. This version emphasizes cross-platform app work, mobile product delivery, and the systems around apps that make them reliable in practice.

Why this version fits

- Cross-platform delivery across Flutter, Ionic, Capacitor, and React Native-adjacent work
- Experience with notifications, testing, and workflows that support real mobile usage
- Product mindset shaped by features used by craftsmen, learners, and IoT scenarios

Core stack

Flutter

BLoC

Experience

CURRENT ROLE

Junior Fullstack Software Developer

Montamo GmbH

Stuttgart / Remote · 2025 – Present

- Built a scheduler, AI-powered feedback analysis, mobile guides, and a chat system
- Fullstack across Flutter, Next.js, and Django/DRF in a SaaS platform for craftsmen

Flutter

BLoC

Next.js

Tailwind

tRPC

Django

GCP

STARTUP JOURNEY

Mobile / Fullstack Developer

Savvi Learning GmbH · Intern → Working Student → Thesis

Stuttgart · Apr 2023 – Jul 2025

- Shipped a cross-platform learning app and a 360° feedback feature that became a key selling point
- Improved DX: linting standards, CI/CD automation, mobile testing framework
- Built a push notification system from scratch (n8n + GraphQL + OneSignal) — still in production

Ionic

EDUCATION

B.Sc. Software Engineering / Media Informatics

Esslingen University of Applied Sciences

Esslingen, Germany · 2021 – 2025

Media Informatics and Software Engineering with a focus on frontend and mobile development — academic fundamentals combined with real delivery pressure at a startup.

Media Informatics

WHERE IT STARTED

Volunteer Social Year

Tadoshi Hoikuen

Gunma, Japan · 2020 – 2021

A year volunteering at a Japanese kindergarten — daily life in another language and culture. Built patience, empathy, and intercultural skills that still shape how I work today.
